

We are constantly developing innovative technologies in order to obtain high cutting performances

**HIGH SPEED CUTTING**

Blade speed up to 3000 mt/min
Only for aluminium cutting

**HIGH SPEED STEEL**

Blade speed up to 300 mt/min

**SURE LOCK SYSTEM**

Strong clamping devices

**TURNABLE BLADE-GUIDE**

0°-90° Turnable blade-guide

**T-LOAD SYSTEM**

Working table designed for different loading operations:
Crain, Forklift ecc..

**ANTI- VIBRATIONS**

Avoid vibrations on metal sheets during the cutting operation

**360° TURNTABLE**

Great advantage for molds makers
Up to 9 cuts with a single set-up

**SMART TABLE**

Integrated spheres system that allow an easily material handling
Only on VTS model

**ANTI JAMMING SYSTEM**

It prevents locking of the blade during slabs cutting operations
Only for aluminium cutting

**ACTIVE FEEDING CONTROL**

Auto-controlled feeding technology. It ensures high accuracy during all cutting operations

**HMI SYSTEM**
always connected

New Human Machine Interface
WIFI - remote - MES ready - Db real time video service
